

Animation Effects

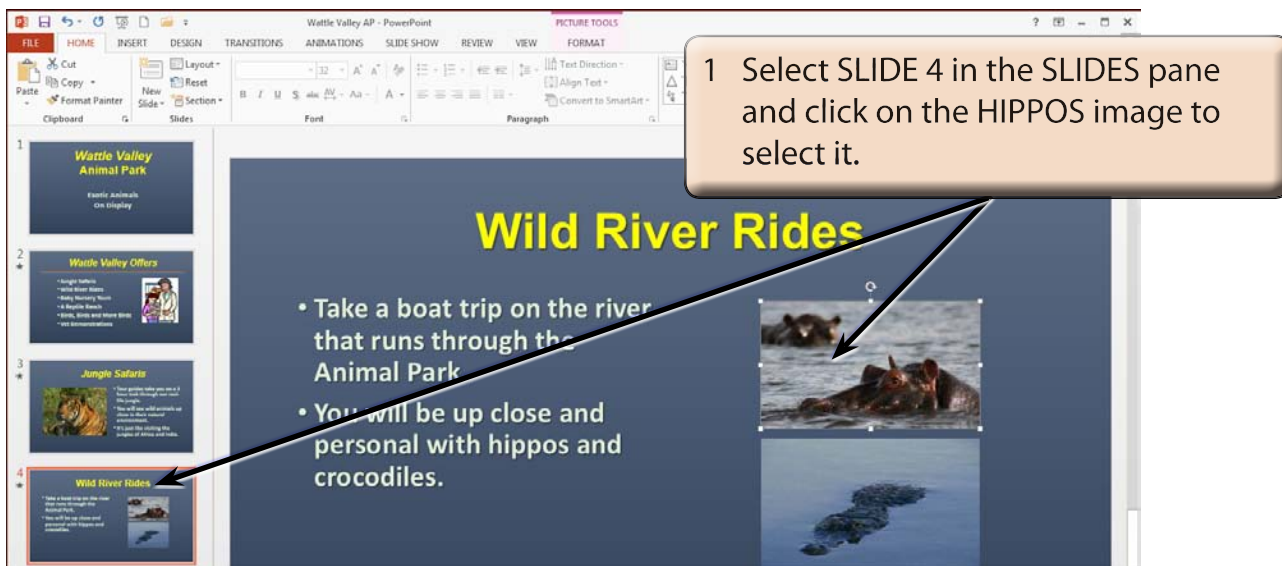

You can enhance the appearance of slides through the use of animation effects. For example, you can make text fly onto the screen one point at a time, dim it after it has been viewed, make graphics move around the screen or fade in and out, and add sounds to objects.

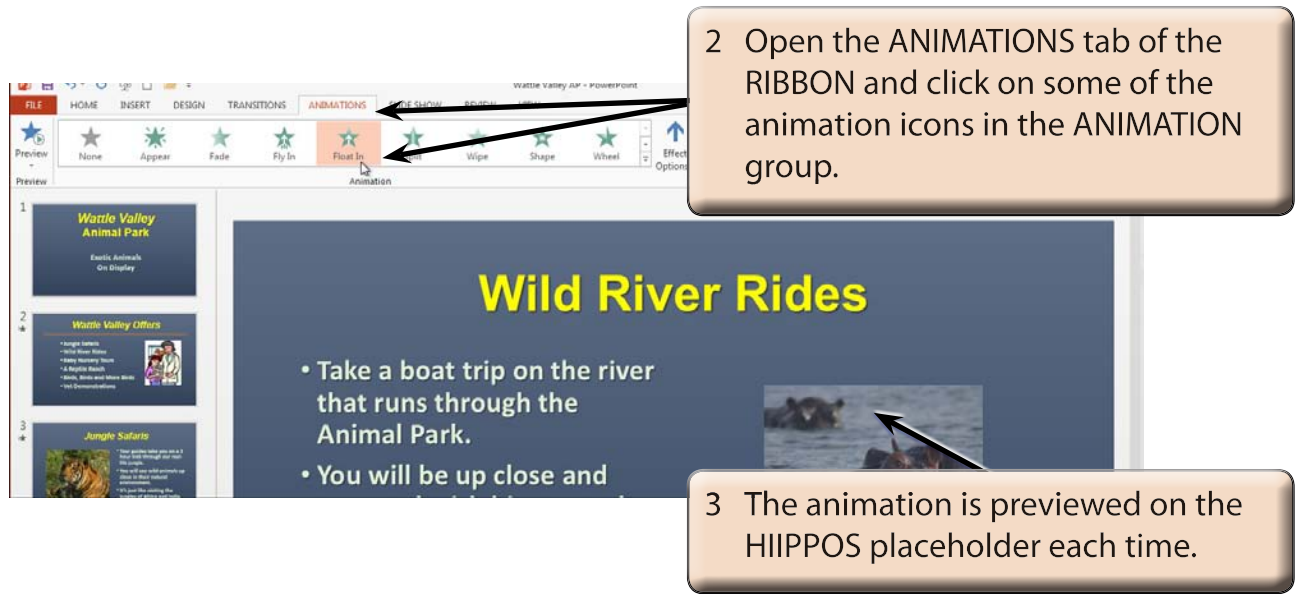

Loading the Presentation

- 1 Load Microsoft PowerPoint or close the current presentation and click on the FILE tab.
- 2 Click on OPEN OTHER PRESENTATIONS in the START window or OPEN in the BACKSTAGE VIEW.
- 3 Navigate to your STORAGE folder and open the WATTLE VALLEY AP file.

Adding Animation Effects

You can quickly apply effects to placeholders to animate their contents.

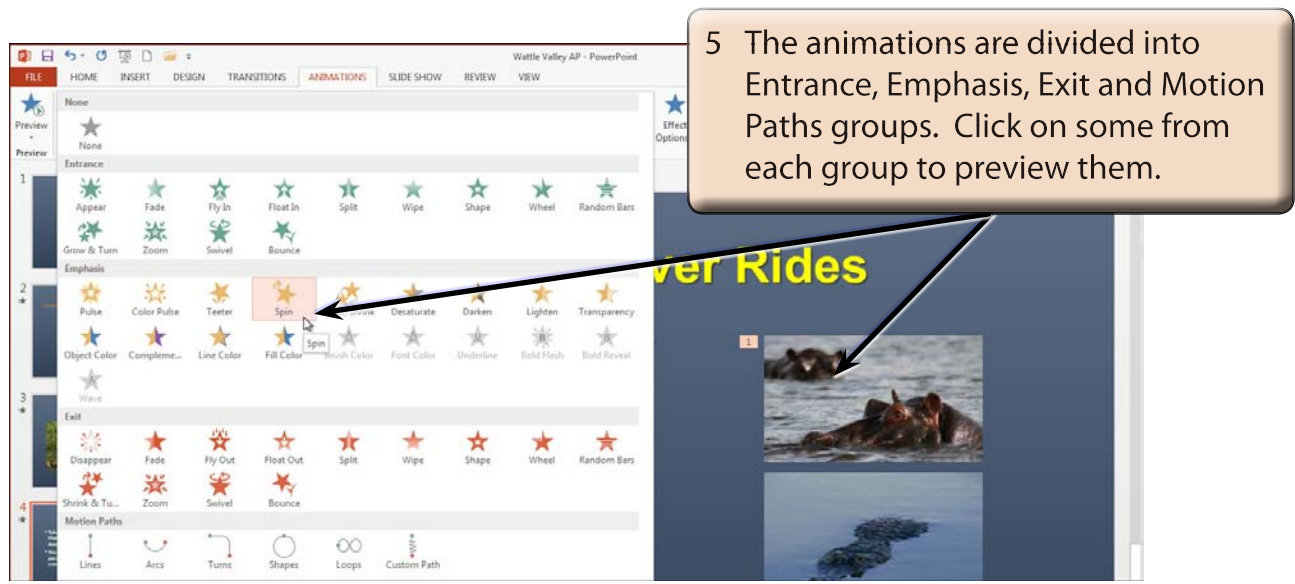

2 Open the ANIMATIONS tab of the RIBBON and click on some of the animation icons in the ANIMATION group.

This screenshot shows the PowerPoint 2013 interface with the 'ANIMATIONS' ribbon selected. The 'Animation' group contains icons for 'None', 'Appear', 'Fade', 'Fly In', 'Float In', 'Split', 'Wipe', 'Shape', and 'Wheel'. A callout box points to the 'Float In' icon. The main slide area shows a slide titled 'Wild River Rides' with a placeholder for a video of hippos.

3 The animation is previewed on the HIIPPOS placeholder each time.

This screenshot shows the 'ANIMATIONS' ribbon with the 'More' icon (a star with a plus sign) highlighted. A callout box points to this icon. The main slide area shows the 'Wild River Rides' slide with the hippos placeholder.

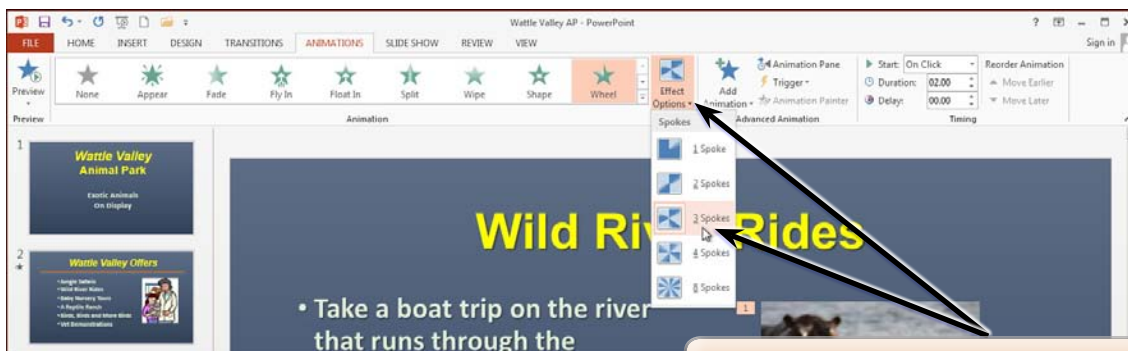

4 Click on the MORE icon at the bottom right of the ANIMATION group to see more animations.

This screenshot shows the 'ANIMATIONS' task pane expanded. It displays various animation categories: Entrance (Appear, Fade, Fly In, Float In, Split, Wipe, Shape, Wheel, Random Bars), Emphasis (Grow & Turn, Zoom, Swivel, Bounce, Pulse, Color Pulse, Teeter, Spin, Shrink, Oscillate, Darken, Lighten, Transparency), Exit (Disappear, Fade, Fly Out, Float Out, Split, Wipe, Shape, Wheel, Random Bars), and Motion Paths (Lines, Arcs, Turns, Shapes, Loops, Custom Path). A callout box points to the 'Spin' icon in the Emphasis group. The main slide area shows the 'Wild River Rides' slide with the hippos placeholder.

Effect Options

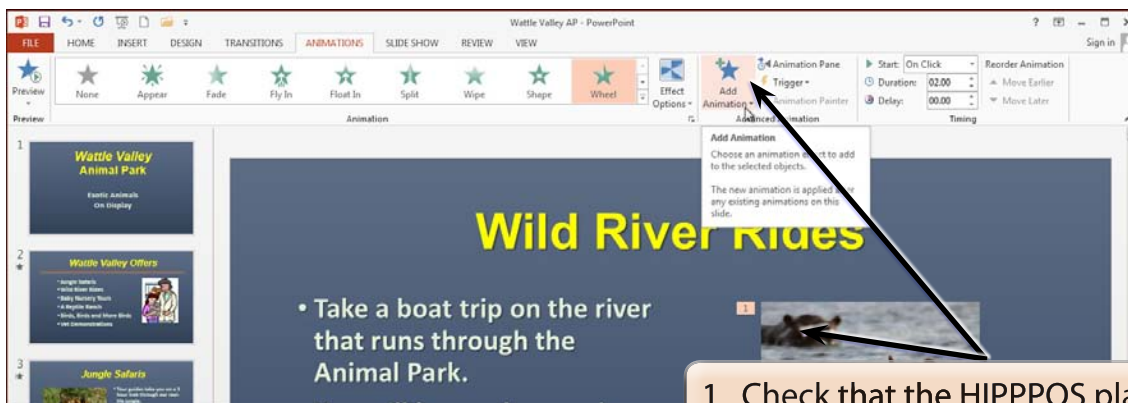

Most effects have a series of options that can be applied to them. These effects vary for different animations.

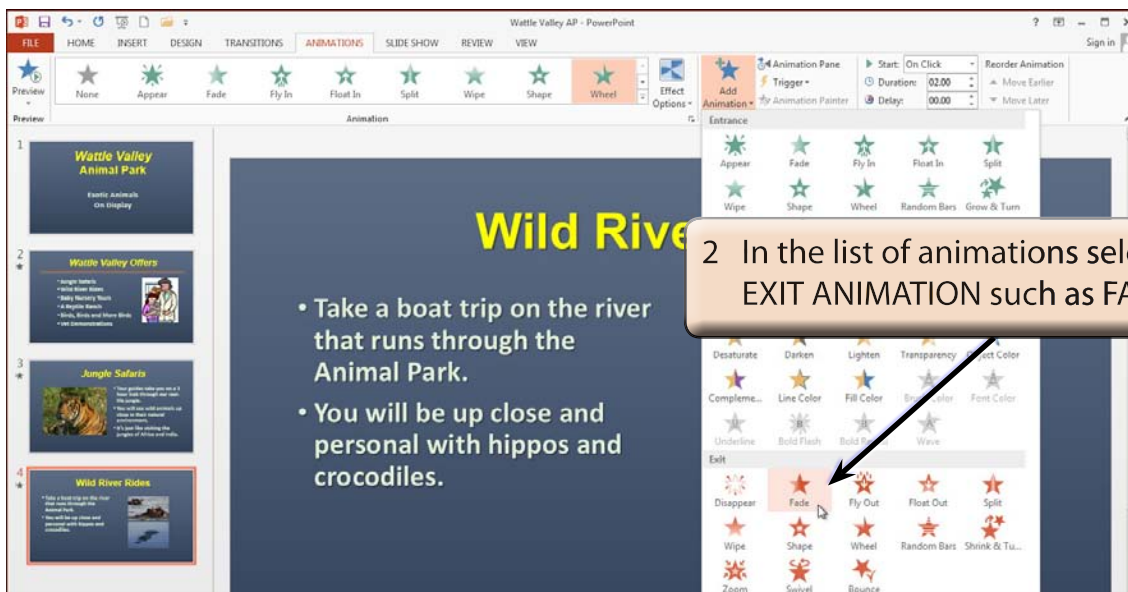

2 Select an effect that you like.

Adding Animation Effects

You can apply more than one animation effect to a placeholder. Additional animations play in the order that you apply them. Let's add an exit animation to the HIPPOS placeholder.

1 Check that the HIPPPPOS placeholder is selected then click on the ADD ANIMATION icon in the ANIMATIONS tab of the RIBBON.

2 In the list of animations select an EXIT ANIMATION such as FADE.

NOTE: Exit animations are usually set to operate at the end of a slide.
